priyabagade31@gmail.com

Am Maselakepark, Spandau, Berlin 13587.

SKILLS

- Python, Pyspark
- SQL, Pl-SQL
- Azure DataBricks
- Azure Data Factory
- DevOps
- SAP
- ERP Systems
- Agile Methodology
- ETL Models
- Git SCM
- Terraform
- Data Warehouse
- SSIS
- Kubernetes
- Power BI

CERTIFICATION

- **Microsoft Azure AZ-204**

PROFILE

Overall, 6 years of experience as a Data Engineer experience with Python and corresponding Data analysis, Data Visualization, Pandas, SQL, Azure Data bricks(ADB), Azure data factory(ADF), DevOPs, PowerBI. Familiar with cleaning and organizing data for use by technical. A Highly organized, motivated and diligent with significant background in Python Programming.

WORK EXPERIENCE

Accenture

Data Engineer

2022-2024

- Collaborated with application teams to understand the project requirements and business objectives to configure on data bricks using Python. Perform Data Cleaning, features scaling.
- Created reusable and production-ready PySpark notebooks for large-scale data cleansing, transformation, aggregation, and enrichment of structured and semi-structured datasets.
- Developed modular Python and R scripts for data processing, automation, validation, data analysis, and operational support.
- Designed scalable data processing frameworks using PySpark, applying Spark optimization techniques such as partitioning, caching, broadcast joins, predicate pushdown, and efficient transformations.
- Analyzed and optimized complex SQL queries, stored procedures, joins, aggregations, and data transformations to improve query performance and reduce processing time.
- Developed end-to-end ETL/ELT pipelines for batch and incremental data processing, integrating data from relational databases, APIs, Kubernetes, Terraform,files, and cloud-based data sources.

2020- 2022

Capgemini

Associate Consultant

- Worked with Python and SQL (PL/SQL) for data processing and backend logic
- Built scalable ETL/ELT workflows for integrating data from multiple source systems into centralized Lakehouse environments.
- Optimized SQL queries and PySpark transformations to improve pipeline performance and reduce execution time for large-volume data processing.
- Prepared and optimized curated datasets and data models for Power BI dashboards, reports, KPIs, and business intelligence solutions.
- Worked with Power BI teams to improve report and dataset performance through optimized queries, data models, transformations, and efficient data refresh strategies.
- Performed unit testing, integration testing, and data validation to ensure pipeline accuracy, completeness, and reliability before production deployment.

PRIYANKA BAGADE

DATA ENGINEER

LANGUAGES

- English (Fluent) C1
- German (Intermediate) B2
- Hindi (Fluent)
- Marathi (Fluent)

LinkTag Global Pvt ltd 2019-2020
Sr Software Engineer

- Data extractions, create pipeline using ADF create notebook on ADB and backend development for tools Worked on PostgreSQL database created procedures. We are extracting data from different sources on ADLS and delivered data on dashboard.
- Using DevOps, we are deployed project. Also, we are using Agile JIRA Board to maintain our work retro. Proficient in Relational Database Management Systems (RDBMS).
- Collaborated with Solution Architects, Senior Data Engineers, and cross-functional stakeholders to gather requirements, design data solutions, and deliver project milestones.
- Proficient in ETL using SQL Server Integration Services (SSIS) to build Data Integration and Workflow Solutions, Extract, Transform and Load (ETL)solutions.
- Experience in creating SSIS packages to automate the Import and Export of data to and from various sources like SQL Server, Oracle text file, excel files using SSIS.
- Experience in creating jobs, SQL Automate Mails, Alerts and schedule SSIS Packages using SQL Server Agent.

FigMD Pvt Ltd 2018- 2019
Associate Software Engineer

- Responsible for data aggregation, data cleansing, missing value imputation and descriptive and inferential analysis. Implemented data processing applications to collect, clean and normalization volumes of open data.
- Communicated and presented profile reports using Python and PowerBI, analytical results, and strategic implications for strategic decision making. Managed PowerBI dashboard in Tableau server and optimized dashboard performance. Optimize SQL performance, integrity and security of the project's databases/schemas.

EDUCATION

Bachelor of Computer Engineering 2012-2016

JSPMS BSIOTR | PuneUniversity

HOBBIES

- Painting 🎨 – Expressing creativity and attention to detail.
- Trekking ⛰️ – Building endurance, discipline, and team spirit.
- Travelling 🌍 – Exploring diverse cultures and perspectives.
